[Spotted](#) | Metal Boy by De Giulio

[Kitchen designer Mick De Giulio](#) has added a gorgeous freestanding cabinet to his

signature line. The Metal Boy is an alternative to the traditional pot rack, combining enclosed storage for pots, pans, lids, baking sheets, and dishes. Crafted in distressed nickel silver, highly-polished stainless steel, ebonized walnut, and glass, Metal Boy also has [LED lighting](#) to play up the sculptural form of the interior. See Metal Boy at the De Giulio showroom in LuxeHome at the Merchandise Mart.
